# *The Economic Policy Institute*

*was established in 1986 by some of the nation's leading economists who saw the need to have an institution focused on economic issues.*

*In line with its mission, "to inform people and empower them to seek solutions that will ensure broadly shared prosperity and opportunity," the Economic Policy Institute provides research and information about the economy to help progressive activists make a case for change, and in addition, provide policy prescriptions that can help advance the cause of shared prosperity.*
